

Porter Cable 690LR Base Replacement

This guide will show you the steps to take off the base from the Porter Cable 690LR Router.

Written By: Emma Stine

INTRODUCTION

This is a basic action performed in order to disassemble most of the other components contained in the router. No tools except your hands are required to perform this task.

TOOLS:

- [2 Hands](#) (1)
-

Step 1 — Base

- Undo the black latch located on the base of the router by pulling upwards from underneath it.

Step 2

- Twist the base off the router.
-  You may need to jiggle the base of the router slightly.

To reassemble your device, follow these instructions in reverse order.
